## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4 and 14-16, drawn to a prefabricated material.

Group II, claim(s) 5-11 and 17-22, drawn to a method of making a hot-tensioned false ceiling.

Group III, claim(s) 12, 13, and 23-25, drawn to a false ceiling.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The claimed special technical feature of the prefabricated material of thin flexible polymer sheet, which carries a direct printing of designs of shapes and dimensions that are predetermined once the material is hot-tensioned is known as shown for example by Monroe et al (U.s. 5,280,305). Monroe et al discloses a this sheet of polymer material, which absorb the printer ink, and allow the image or design and the sheet to be thermally stretched. (Col 11, line 60 to Col 12, line 11)

3. A telephone call was made to Charles L Gagnebin III on September 25, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
